# SOFTCLEANSE™ HAND SANITISING GEL

**MEDICHIEF®**  
making the world a safer place

Instantly effective, quick-drying gel sanitises hands immediately without needing soap or water. The unique, skin-kind formula leaves hands clean and refreshed with no stickiness.

Medichief SoftCleanse™ Hand Sanitising Gel is formulated from a unique, skin-friendly blend of 70% alcohol and biocides combined with aloe vera and allantoin extracts. These powerful ingredients work together to moisturise and condition the skin, helping to prevent dry, cracked hands often associated with other alcohol gels and rubs.

With a well-balanced, liquid-gel consistency that is easily spread, hands can be quickly and effectively sanitised while on the go. Automatic and manual dispensers are often challenged when delivering gels, with clogging and dried compounds resulting in costly maintenance routines. This has been resolved with SoftCleanse™ Gel by formulating a viscosity that ensures bulk-fill dispensers can operate reliably.

Conforming to rigorous European standards for bactericidal and fungicidal characteristics, as well as dermatologically tested, Medichief SoftCleanse™ Hand Sanitising Gel can be trusted to protect you while caring for your hands every single day.
